- Global Decisions Support Systems (GDSS)
- Tanker Airlift Mobility Information System (TAMIS)
- Agile Transportation for the 21st Century (AT21)
- Analysis of Mobility Platform (AMP)

[MOUSE Application Development Framework](#) [1]

MOUSE is an open source application development framework created by **Black Hill Systems, LLC** engineers for the rapid development of enterprise software. MOUSE is frequently updated to maintain its HTTP, W3C DOM, CSS 3, XML, JSON and OWASP ASVS standards compliance. It is written to comply with the ECMA and PEAR2 Coding Standards.

LUMINOUS Laboratory Information Management System (LIMS)

Luminous is a laboratory information management system designed for the chemistry, biology, genomics, and pharmacology professions. It provides chemo-, bio-, and genominformatics tools to researchers at a price approachable by small and medium sized ventures.
