Setting up an SSH Server (sshd)

published by admin on Sat, 04/11/2015 - 20:25

Install cygwin (http://cygwin.com [1])

- include openssh and openssl
- add c:\cygwin\bin to the PATH
- chmod +r /etc/passwd
- chmod u+w /etc/passwd
- chmod +r /etc/group
- chmod u+w /etc/group
- chmod 755 /var
- touch /var/log/sshd.log
- chmod 663 /var/log/sshd.log

Configure the SSH Daemon

- ssh-host-config
- answer yes to yes/no queries
- set the CYGWIN value equal to ntsec tty
- answer no if you're asked to use a different name
- answer yes
- provide a password for the user
- net start sshd

Synchronize the users between Windows and cygwin

- mkpasswd -cl > /etc/passwd
- mkgroup --local > /etc/group
